

Title : Map - Centric Dashboard

Author: Aisha Zafar
Date : 19/10/25
Sheet 5
Task: Designing
Map - Centric
Dashboard

⇒ Focus:-

- Present a geographic comparison of poverty, income and population across Malaysian states using a single choropleth map.
- Highlight regional disparities, especially b/w Peninsular and East Malaysia
- Designed for general Malaysian audience, so readability and simplicity are prioritised over analytical depth

⇒ Operations:-

- Data integration of the csv and json files
- Visual encoding

⇒ Discussion:-

Advantages

- Strong spatial story telling
- Compact design
- Works well for showing inequality and regional contrast

Disadvantages:

- only one metric visualized at a time

- small states (eg Perlis) visually under-represented
- limited snapshot style analysis
